

Leo R. Cullinan, DDS, MS

Board Certified Orthodontic Specialist

In-House Lab Services

While Dr. Cullinan has worked with the top American Orthodontic Laboratories over the course of his career, we also provide “In-House” laboratory services. There are situations that arise daily where the delivery of appliances is time sensitive. These include placement and replacement of retainers, aligners, space maintainers, expanders, bite plates for opening the bite, preparation for fixed, bonded retainers, etc. With our on-site laboratory, we have the equipment and expertise to fabricate and deliver the highest quality appliances in a timely manner.
