Board Certified Orthodontic Specialist

Comprehensive Orthodontic Treatment

Comprehensive Orthodontic Treatment relates to the orthodontic treatment of adolescent, teenage or adult patients with fixed orthodontic appliances (braces) designed to achieve beautiful and healthy smiles.

Crooked and crowded teeth are hard to clean and maintain. This factor contributes to conditions that cause not only tooth decay, but eventually gum disease and tooth loss.

Other orthodontic problems can cause abnormal wear of tooth surfaces, excess stress on supporting bone and gum tissue, or misalignment of the jaw joints, with resultant chronic headaches or pain in the face or neck.

Left untreated, many orthodontic problems become worse.
